A13.28:T61/2/1984

TONGASS *National Forest*
land management plan

MAP UPDATE

This map is an update to the Tongass Land Management Plan, as published in February 1979. The map is being published to reflect changes made in the Tongass Plan Land Use Designations (LUD's) as a result of the Alaska National Interest Lands Conservation Act (ANILCA). ANILCA, which is Public Law 96-487, was passed by the Congress in December 1980.

LAND USE DESIGNATIONS - LUD'S

Wilderness (LUD I) Established Under ANILCA

Wilderness Areas will be managed as directed by the 1964 Wilderness Act, as amended by ANILCA, which provides for the following uses: Fishing, hunting, trapping, subject to State Fish and Game regulations; subsistence uses; public recreation cabins existing and limited new; structures and facilities under special use permit and/or public use; fish habitat enhancement; access to private, State, Native lands; use of airplanes, motor boats, and snow machines; mineral validity; and commercial fishing.

Lands Released from Wilderness Recommendation (LUD II)

These lands were considered by Congress for wilderness designation during consideration of ANILCA. The Congress decided not to include these lands in the National Wilderness Preservation System, thus directing their release from LUD I status. The allocation of these areas to LUD and Use Designations will be determined in the future through the land management planning process.

Nonwilderness National Monument Lands

These lands, although not subject to provisions implemented in the National Wilderness Preservation System, will be managed to protect objects of biological, cultural, geological, historical, prehistorical, and scientific interest. Harvesting of timber for commercial purposes is not permitted. ANILCA has recognized the mineral values in these locations and has provided for mineral development. Although withdrawn from entry, the Act makes provisions for continued prospecting on lands within 1/4 of a mile of valid mineral claims.

LUD II

These lands are to be managed in a roadless state to retain their wildland character, but this would permit wildlife and fish habitat improvement and primitive recreational facility development. This designation will exclude:

(1) Roads, except for specifically authorized uses.

(2) Timber harvesting, except for controlling insect infestations or to protect other resource values.

(3) Major concentrated recreational facilities.

LUD III

These lands will be managed for a variety of uses. The emphasis is on managing for uses and activities in a compatible and complementary manner to provide the greatest combination of benefits. These areas have either high use or high amenity values in conjunction with high commodity values. Allowances in calculated potential timber yield have been made to meet multiple objectives. These lands may include concentrated recreational developments.

LUD IV

Opportunities will be provided for intensive resource use and development where emphasis is primarily on commodity or market resources. Allowances in calculated potential timber yield have been made to provide for protection of physical and biological productivity.

Areas not managed within a LUD primarily for timber are excluded from calculation of timber yield.

Areas for which specific management direction is written into Land Management Plans direct that timber harvest will be scheduled only if it is consistent with the primary purpose of the area. Examples are municipal watersheds, scenic areas, and areas of high fish habitat value.

Generalized, and subject to change as more site-specific information is developed.

Lands within the Tongass National Forest boundary.

Subject to valid existing rights and the provisions of ANILCA, as amended, including but not limited to, applicable withdrawals, reservations, and conveyances.

ADDITIONAL INFORMATION

The wilderness boundaries shown on this map reflect December 31, 1983 Wilderness Study Report recommendations and boundaries.

Lands within the Tongass National Forest boundary but not within the Wilderness Study Report boundaries are available for possible development.

The following Rivers have been designated as Wild or Scenic by ANILCA and are managed in accordance with the Wild and Scenic Rivers Act: Alsek, Unuk, Chilkoot, Klehini, Chilkat, Kelsall, Bradfield, Andrew Creek-Town Lake, Karta, Eagle, Cripple, Salmon, Taku, Tahltan, Tuya, Blossom, Keta, Kasiana Creek, Harris River, Big Creek, Ella Creek, Staney Creek, Thorne River, Hatchery Creek, Maybeso Creek, Maybeso Creek-South Fork, Kadake Creek, Karheen Creek, Hugh Smith Lake Outlet Creek, Virginia Lake-Hugh Smith Lake, Margaret Creek, Rio Roberts, Trocadero Creek, Anan Creek, Wilson Creek, Steamboat Creek, Black Bear Creek, Porcupine Creek, Fish Creek, Winding Creek, Cabin Creek, Peterson Creek, Falls Creek, Marten Creek, Rowan Creek, Crystal Creek, Kegan Creek, Rocky Pass Creek, Lindenberg Peninsula, Duncan Salt Chuck, Ernest Sound, Naha River, Karta River, Unuk River, Salmon River, Chickamin River, Stikine River, Tahltan River, Tuya River, Blossom River, Keta River, Kasiana Creek, Harris River, Big Creek, Ella Creek, Staney Creek, Thorne River, Hatchery Creek, Maybeso Creek, Maybeso Creek-South Fork, Kadake Creek, Karheen Creek, Hugh Smith Lake Outlet Creek, Virginia Lake-Hugh Smith Lake, Margaret Creek, Rio Roberts, Trocadero Creek, Anan Creek, Wilson Creek, Steamboat Creek, Black Bear Creek, Porcupine Creek, Fish Creek, Winding Creek, Cabin Creek, Peterson Creek, Falls Creek, Marten Creek, Rowan Creek, Crystal Creek, Kegan Creek, Rocky Pass Creek, Lindenberg Peninsula, Duncan Salt Chuck, Ernest Sound.

ALLOCATION SUMMARY

2,692,000 A		1,751,000 A	1,029,000 A
33%		22%	13%
962,000 A		5 1,000 A	1,362,000 A
16%		16%	40%
2,269,000 A		367,000 A	1,749,000 A
44%		7%	34%
5,483,000 A		2,656,000 A	4,140,000 A
33%		16%	25%
